DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Mori et al.

This reference discloses in col. 2, lines 50-60, col. 10, lines 9-65, col. 12, lines 35-45 and claim 4 a method of making a magnetic recording device comprising providing a substrate, applying a non-magnetic layer to the support and drying. The magnetic layer is applied using a wire bar coating device. It is the examiner's opinion that applicants' process is anticipated by the reference process.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori et al for the same reasons as urged in the above paragraph. It is the examiner's opinion that the limitations of these dependent claims are conventional and do not render these claims unobvious. See Morishita et al., col. 28, lines 10-15 and col. 29, lines 1-45 for

Art Unit: 1762

wire bar coating thickness of .01 to 10 microns and application of a coating to a cured under-layer to prevent solvent damage to the under-layer.

Claims 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori et al in view of Morishita et al for the same reasons as urged above. It is the examiner's opinion that it would have been obvious for one having ordinary skill in this art at the time the invention was made to cure the dried under-layer of the primary reference as suggested by the secondary reference in order to prevent solvent damage to the under-layer at the time of application of a top layer. The limitations of the dependent claims are conventional and do not render these claims unobvious for the same reasons as urged in the above paragraph.

Response to Arguments

Applicant's arguments filed 7-29-02 have been fully considered but they are not persuasive in view of the new art rejections.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1762

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
